DCR is delighted to announce [registration](#) is now open for the next DCR Medical Grant Writing Program for Clinicians—**with evening hours**—through May 1, 2024 (or until spots fill). The Program requires a total time investment for writing consultations and workshops of around 10 hours **over 6 months**.

The Program is designed for clinicians seeking to enhance their skills regarding applications for grant funding for clinical research projects. DCR's Medical Grant Writing Program for Clinicians offers an intensive program focused on planning, writing, developing, and revising scientific grant application materials written in English.

The Program blends individualized medical grant writing guidance through individual writing consultations and group workshops. **Three individual writing consultations** occur over certain weeks with **group workshops** on 3 Monday evenings for the Program.

The Program starts with one-on-one writing consultations the week of June 3 and concludes with the last group workshop at sitem-insel on Wednesday, December 9.

The DCR Program is ideal for applicants who seek to submit grant applications to funders after December 2024, although we welcome applicants pursuing grant opportunities with other submission goals. Program organizers expect full commitment from participants, including **attendance** at all scheduled events.
