

DEPARTMENT OF
CLINICAL RESEARCH
LECTURE SERIES 2024

WEDNESDAY, 27 MARCH 2024
12.45 – 1.30 PM

Dr Simon Wandel

**“Reflections on event adjudication in
cardiovascular outcome trials”**

Event adjudication is widely applied in cardiovascular outcome trials (CVOTs) to standardize endpoint ascertainment and remove potential bias due to spurious events. I will present selected findings from a recent individual-participant meta-analysis that we undertook to evaluate the effect of event adjudication for heart failure outcomes. In the second part, I will highlight some statistical challenges around milestone event prediction for CVOTs.

Simon Wandel holds a master in Statistics and a PhD in Medical Statistics/Epidemiology (both from University of Bern). Since 2021, he is the Global Group Head Biostatistics for atherosclerotic cardiovascular disease at Novartis Pharma AG.
